

Legacy Roofing Celebrates 20 Years in Business

The company's commitment to outstanding customer service provides a strong and lasting foundation for the future.

REDMOND, Wash. (June 24, 2008) – Legacy Roofing, a Redmond, Wash.-based roofing installation company, is celebrating its largest milestone yet - 20 successful years in business. A family owned business, Legacy has built a tradition of quality throughout Washington State's Puget Sound region by hiring and developing exceptional staff, and merging traditional values with leading-edge methods, products and technology.

"This is an exciting milestone for the Legacy family," says company founder and CEO Cliff Hurn. "It's also confirmation of the value customers derive from our *Gold Standard* of quality and customer service. It has helped us build a strong foundation on which the company will continue to grow for many years to come."

Legacy's *Gold Standard* provides the company and its employees with rigorous standards of excellence in all areas of operations to ensure that every customer experiences the best in reliability, quality, luxury, and technology.

Legacy began as Shake Specialists in 1988, when Hurn used his experience from years of working his family's cedar shake business to begin installing roofs himself on residential and commercial new construction. The company changed its name to Legacy Roofing in the year 2000, and launched an unprecedented period of growth.

The company has been recognized recently for its outstanding business practices and exceptional growth by several industry trade publications and business organizations, including *Replacement Contractor*, *RSI*, the Master Builders Association and the Bellevue Chamber of Commerce.

Legacy also remains deeply committed to the local communities it serves. It continues to sponsor several local events, including the Susan G. Komen Race for the Cure and the Jacob Green Foundation benefiting Fred Hutchinson Cancer Research. The company is also a presenting sponsor for this year's Team Parkinson Seattle to Portland Bike Ride, benefiting the Northwest Parkinson's Foundation.

"The measure of a successful business involves more than just growth and profits," said Hurn. "At Legacy, we also strive to make a positive impact on the communities we serve."

Legacy also focuses on environmental stewardship by taking the lead in several areas. The company is an active "Built Green Contractor," which maintains and improves our quality of life by using materials and practices that help protect the environment.
